

## Vision, Values, and Mission

The Families in our community value the natural beauty of The Preserve and its extraordinary geographical, historical, and cultural setting. They also share a profound appreciation for the gifts life and The Preserve offer — most of all family, friends, and neighbors.

We actively support the values of conservation by committing ourselves to architectural design and land use that are compatible with The Preserve's landscapes, environment, and ecology.

We are personally involved in maintaining a responsible community government, and supporting long-term, fiscally sound management that provides excellence in services, facilities, and events, and maintains the highest aesthetic standards.

Our members are committed to being trustworthy good neighbors who communicate openly and often with our friends in surrounding communities, whose history, culture, and diversity we respect and support.

We recognize the importance of the concept of "One Preserve" — that the whole is greater than the sum of its parts. We meanwhile respect ALL members of our community, and the diversity of lifestyles that fall within The Preserve's values of neighborliness and inclusiveness.

Finally, as there is nothing more rewarding than sharing this beautiful place with family and friends, our community is dedicated to gracious informal hospitality.
